WORK EXPERIENCE

Siuvo Inc., Princeton, NJ

June 2019 – July 2019

Research and Development, Summer Internship

- Work on Optical Character Recognition (OCR) with open source engine Tesseract. Write Python programs to postprocess OCR results, extract values, and calculate their confidence levels for medical lab test reports. To be utilized by the team in production to automate the process of lab test report digitization.
- Image processing with ImageMagick, OpenCV-Python to enhance text in an image and improve Tesseract accuracy.
- Retrain Deep Learning neural networks in Tesseract to recognize characters it cannot recognize originally.
- Work on DeepPose project to recognize human skeleton joint positions. Follow a Github repository to train the model using the Tensorflow Deep Learning framework with GPU acceleration.
- Setup Swagger REST API Interface for my projects with Flask and Flask-RESTPlus.

Department of Physics, Princeton University

Jan 2015 – Present

Research Assistant, Advisor: Prof. Nai Phuan Ong

- Work on topological materials.
- Carry out independent research projects. Coauthor of 8 peer review papers.
- Perform data analysis with OriginLab and MATLAB, using methods such as interpolation, non-linear curve fitting and Fast Fourier Transform. Discover a novel method to more effectively process experimental data.
